

Investing Principles

How we think about investing and why it matters for you.

At Nodaway Valley Investment Services, great financial advice starts with clarity about who you are, what you want, and what it will take to get there. The principles below are the foundation of every recommendation we make and every conversation we have.

PURPOSE → PLAN → PORTFOLIO

1 Your Goals Drive Every Investment Decision

There is no one-size-fits-all portfolio. Every investment we recommend is tied directly to your goals and when you will need the money. Long-term wealth is built with long-term assets. Near-term needs are protected with stable ones. Getting this match right is one of the most important things we do together.

2 Market Downturns Are Expected, Not Emergencies

Volatility is not a flaw in the market. It is a feature. Bear markets have happened roughly every 3 to 4 years throughout history and they will happen again. What matters is that we plan for them so that when they arrive, they are an inconvenience and not a crisis. Investors who stay the course have historically been rewarded for that patience.

3 Discipline Beats Prediction Every Time

Nobody consistently knows what the market will do next. Not us, not Wall Street, not the financial media. Investors who chase headlines or bail out at the wrong moment consistently underperform those who simply hold a well-built plan. We do not guess. We do not react. We stay disciplined on your behalf.

4 We Build Confidence, Not Just Portfolios

A financial plan you do not understand is one you will not trust when markets get rough. That is why we put a lot of energy into communication. We explain not just what we are doing but why. When you understand the reasoning behind your strategy, you are far better equipped to stay calm and stay invested when it matters most.

5 Every Dollar of Cost Is a Dollar Less of Return

We are deliberate about minimizing the drag on your wealth. That means low-cost funds and ETFs, thoughtful tax efficiency, and avoiding unnecessary transactions. Over time, small differences in cost compound into large differences in outcomes. We treat your money the same way we treat our own.

6 We Invest the Same Way We Advise You To

We do not ask you to do anything we are not willing to do ourselves. Our own investable assets are managed using the exact same principles we apply to your portfolio. That kind of alignment matters and we are proud to put our money where our advice is.

These principles are the standard we hold ourselves to every single day. We hope they give you a clear sense of how we think, how we work, and why we believe this approach gives you the best shot at the future you are planning for.
